SowComfort. Never before has standing been so easy!

SowComfort is the world's first plastic flooring with integrated rubber mat that guarantees secure foothold and stability for sows and piglets in the farrowing pen:

- animal-friendly, non-slip, hardwearing material
- rubber prevents grazes and injuries to the teats
- better milk production and higher weaning weights, as the sow stands up more often and has an increased feed and water consumption
- significantly reduced piglet losses due to overlaying as the sow is able to lie down slowly and safely
- **real price benefit** as compared to cast iron grids, plastic-covered flooring or metal flooring
