

INNOVATIVE PLASTIC FLOORING WITH INTEGRATED RUBBER MAT

**Brilliant idea.**  
**And only from**  
**Big Dutchman.**

**HOUSING SYSTEMS**

DRY FEEDING

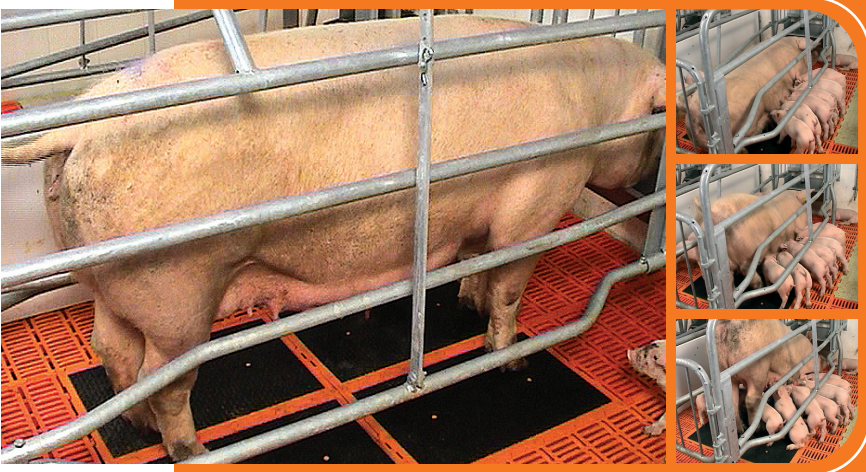

LIQUID FEEDING

ENVIRONMENT CONTROL

SLURRY SYSTEMS

FEED STORAGE

**SowComfort. Never before has**  
**standing been so easy!**

**SowComfort** is the world's first plastic flooring with integrated rubber mat that guarantees secure foothold and stability for sows and piglets in the farrowing pen:

- animal-friendly, non-slip, hardwearing material
- rubber prevents grazes and injuries to the teats
- better milk production and higher weaning weights, as the sow stands up more often and has an increased feed and water consumption
- significantly reduced piglet losses due to overlaying as the sow is able to lie down slowly and safely
- **real price benefit** as compared to cast iron grids, plastic-covered flooring or metal flooring
