

BROILER BREEDER MANAGEMENT

NESCA 2.0 POULTRY SCALE ➔ RELAX-NEST ➔ FACT SHEET

FULLY AUTOMATIC WEIGHT DETERMINATION

More than 500 weighings
per day ➔ compared to
manual weekly samples

NO INFLUENCE ON BEHAVIOUR

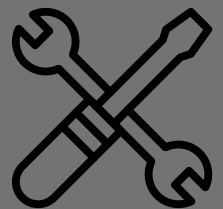

Breeders are
weighed unnoticed
when they enter
the nest ➔
using the natural
behaviour without
causing stress

INTEGRATION INTO MANAGEMENT SYSTEM

Control via the Viper production
computer ➔ individual
settings and time-controlled
weight determination

FLEXIBLE USE

Suitable for new buildings and
for retrofitting existing Relax
nest houses

ACCURATE DATA

Bird weight as an
important indicator for
management and
production
